

Are you a highly-motivated and versatile Technician who also has solid experience in the wiring for Networks, Phones, A/V, or Security installations? Do you have a seasoned portfolio with a proven track record of providing several companies with effective cabling installation for systems such as any of these? Can you manage an installation project independently or with multiple technicians under you? Or even if you are a Solid Technician without leadership experience?

If so, please read on.

About Us:

Business Communications Solutions (BCS) is an industry leading Information Technology company specializing in Telecommunications, A/V and Security infrastructure design, installation, management and Cloud-based telephony services. BCS started off as a telecommunications company with an emphasis on phone systems and low-voltage cabling work but have transitioned into an innovative IT company offering the most current products that the industry has to offer.
