

Are you a highly-motivated and versatile Network Engineer? Do you have a seasoned portfolio with a proven track record of providing several companies with effective networking solutions? Can you troubleshoot desktops and servers? If so, please read on.

About Us:

Business Communications Solutions (BCS) is a technology-driven, single-source solution provider for IT and Telecommunication needs. We cover every voice and data facet to run a business – IT services, phone systems, internet and telephone services, cabling, networking, and server room design and installation. The work environment is fun and the staff has got a great sense of enthusiasm and team work. We are growing rapidly and offer many growth opportunities!

We are seeking a full-time **Network Engineer** who has experience working in the field with different customers and can set up small business networks. This person must think on their feet and have a great attitude with the ability to troubleshoot a variety of workstations and servers.

What is in it for you?

- Medical, Dental & Life Insurance
- Paid Vacations & Holidays
- Performance-based Bonuses
- An exciting and friendly atmosphere
- Great location in Orange County

What you will be doing!

- Implement small-medium sized business networks. Will be installing servers/systems, firewalls, routers, and other equipment for clients.
- Troubleshoot customer workstations and servers
- Install, configure and troubleshoot software applications such as MS Exchange and Symantec Anti-Virus.
- Configure HP and Dell Servers, Cisco and SonicWall Firewalls, Switches, VPN's, NAS Devices, Wireless routers, Veritas Backup Exec & Disaster Recovery, Sonicwall, and other network needs.
- Maintaining database of hardware, software, and other technical items.
- Deploy & Troubleshoot Cisco & Toshiba Business VoIP Phone Systems.
- Install, configure and troubleshoot software applications such as MS Exchange and Symantec Anti-Virus. Other general responsibilities as required by supervisor

What you need!

- 2-4 years of hands on experience in the IT Field
- 2-4 years experience installing and troubleshooting various workstations and servers
- Courteous, tactful, and professional presentation; reliable, flexible, and dependable.
- Ability to work under pressure and independently AND within a team environment.

- Enjoy the challenge of solving problems. Possess strong need and natural talent for analyzing the symptoms, identifying what is wrong, and finding the most optimal solutions.
- Excellent documentation skills and process driven orientation

It's a plus if you have...

- Experienced with installing and troubleshooting Microsoft Exchange & SQL, HP/Dell servers, Cisco hardware, Veritas, Symantec Anti-Virus, Sonicwall and Cisco firewall, routers and switches.
- Current Cisco certifications: CCNA, CCDA, etc.
- Current MCSE certifications
- 2+ years experience with Networking Consulting
- Ability to integrate networks with fax servers

Wage Information

- TBD, based on education and work experience.
